

II. Following the “Megatrend” to deliver great results

An increasingly evident consensus - China's economy will tap more potential for growth, if we can seize the critical and strategic opportunity, follow the megatrend and pursue high-quality development.

II. Following the “Megatrend” to deliver great results

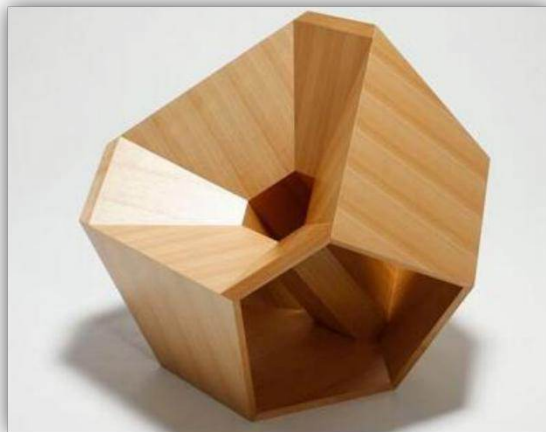

Two high goals: enable **high-quality development** and create **high-quality living standards**

II. Following the “Megatrend” to deliver great results

600 MM m³

20KG

5-8KG

III. Taking on the “Great Challenge” to accomplish the great mission

Challenge: In the context of China-US trade friction

- escalation of China–US trade friction
- accelerated restructuring of global industry and division of work

III. Taking on the “Great Challenge” to accomplish the great mission

Challenge: **Main contradictions in China.**

**China's main contradictions has
changed to **people's growing need
for a high-quality life VS.
imbalanced/insufficient
development.****

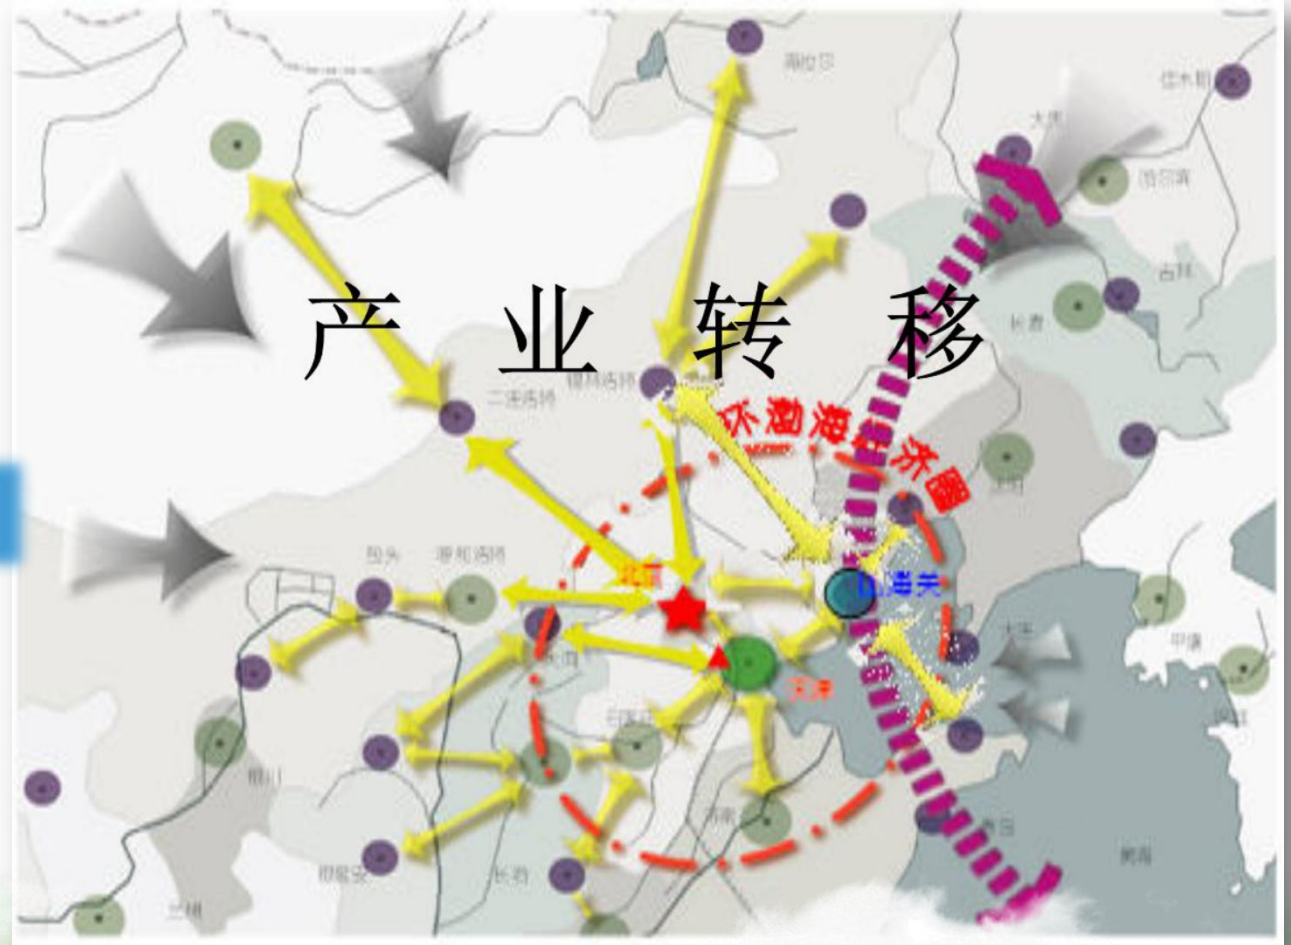

III. Taking on the “Great Challenge” to accomplish the great mission

Challenge: The requirement of industrial shift from the coastal area.

industrial shift to the west

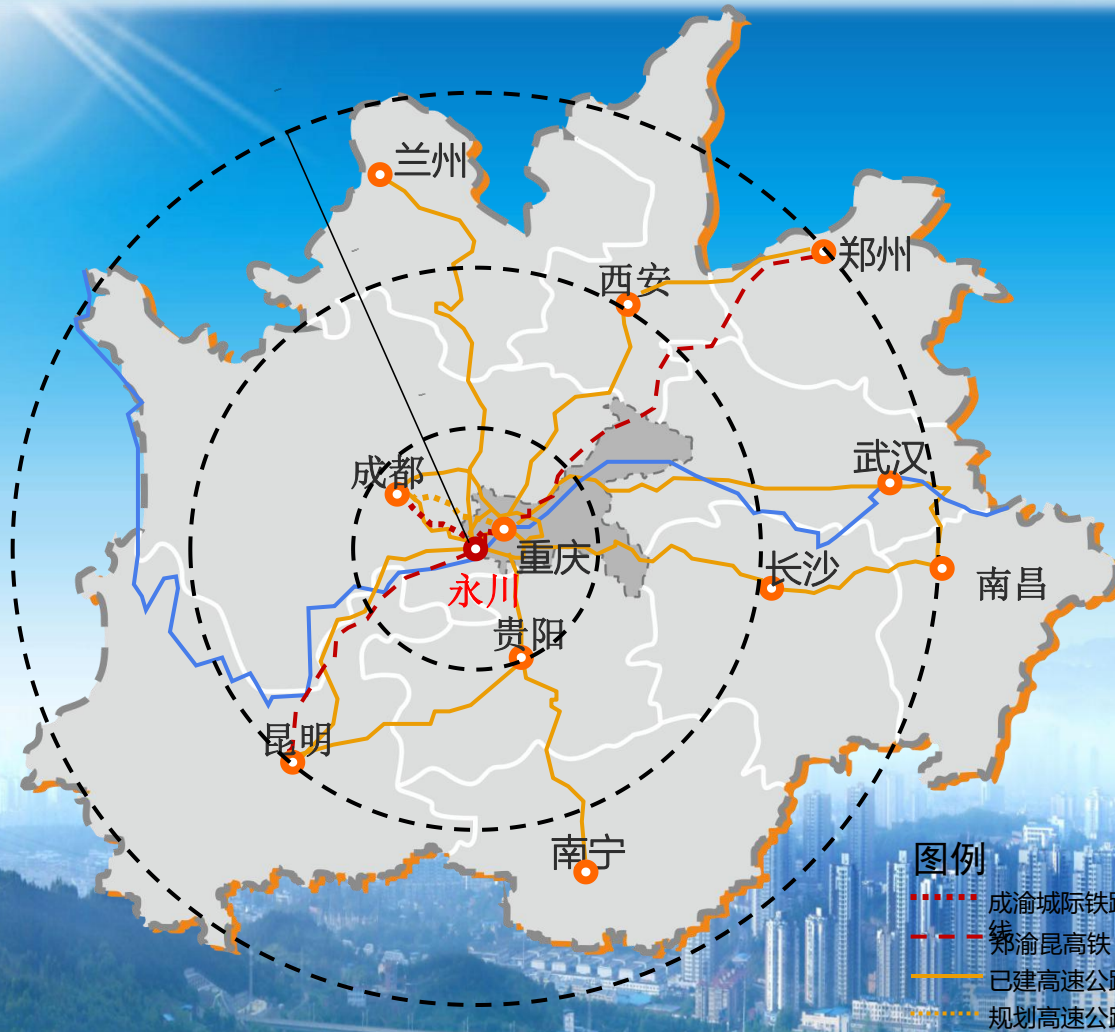

产业转移 一路向西

II. Regeneration of the *strength*, you will do well if you can play your strength

I. Yongchuan, connecting the east, west, south, and north

- ◆ midfield between Chengde and Chongqing (connecting the left to the right, the east to the west)
- ◆ critical node in the Chengde–Chongqing cluster
- ◆ strategic fulcrum of the western Chongqing area

I. Yongchuan, connecting the east, west, south, and north

in close proximity to the start of the Yuxin'ou line, the node of the new land-sea corridor and the intersection connecting Sichuan, Guizhou and Chongqing

- in close proximity to the start of the Yuxin'ou
- corridor to the south
- Chongqing-Kunmin railway
